Address: Lekki, Lagos Nigeria

PROFESSIONAL SUMMARY

Determined Computer Science graduate with hands-on experience in penetration testing, API security, and cybersecurity awareness training. Skilled in leveraging virtual environments, tools, machine learning models and AI-driven techniques—AI Engineering to solve complex challenges. Strong background in technical writing, transcription, and professional communication, with proven ability to deliver accurate documentation and support team efficiency. Fast learner, detail-oriented, and adaptable, committed to continuous growth and contributing fresh perspectives to your team's success.

PROFESSIONAL EXPERIENCE

Taxaide Technologies – Cybersecurity Associate (Intern); Lagos, Nigeria

April 2024 – September 2024

- Conducted penetration testing on web applications, APIs, and internal systems (crAPI, TPay, Capital API, HackTheBox labs), identifying vulnerabilities and providing remediation guidance to strengthen security posture.
- Supported incident response activities and security assessments, contributing to an ISO 27001:2013–certified environment.
- Designed and delivered a cybersecurity awareness training program for employees, improving phishing resistance and overall cyber hygiene.
- Researched and documented exploit methodologies and secure coding practices, enhancing knowledge base for future engagements.
- Worked with firewalls, vulnerability scanners, and networking tools to support secure infrastructure management
- Collaborated with the cybersecurity team to evaluate and test Company applications.

Mastercard Cybersecurity virtual experience program on Forage (Internship)

January 2024

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team
- Assisted with identifying and reporting security threats such as phishing
- Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams

EDUCATION

Covenant University | Bachelor of Science (BSc.) Computer Science | Ogun State, Nigeria | September 2025

Concentrations: Artificial Intelligence, Cybersecurity

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, Artificial Intelligence & Machine Learning, Web Development & Internet Technologies, Human-Computer Interaction, Programming Languages (Python, Java, C++), Cybersecurity & Information Assurance, Theory of Computation

SKILLS & INTERESTS

Interests: Udemy, Personal Development, Understanding Human Behaviour, Perfumery, Entrepreneurship, Business

Languages: Fluent in English

Soft Skills: Good and fluent communication, Effective Leadership, teamwork, management, smart and analytical thinking and problem-solving skills.

Technical:

- **Cybersecurity & Ethical Hacking:** Penetration testing (Web, API), vulnerability assessment, threat modeling, cybersecurity awareness training, Excellent in Linux.
- **Technologies and Tools:** Microsoft Office Suite, ACLs (Access Control Lists), Virtual Machines, Virtual Networks, File Permissions, SIEM tools, incident response.
- **Artificial Intelligence & Machine Learning:** Natural Language Processing (spaCy, NLTK), ML models (Logistic Regression, Decision Tree, Random Forest, XGBoost etc), explainable AI, data preprocessing, class imbalance handling, prompt-engineering.
- **Programming & Development:** Python, JavaScript, Automation, Git/GitHub.
- **Transcription, Typing and Communication:** High-accuracy audio transcription, fast typing speed (WPM: 85), professional email drafting & management, technical writing, and content editing.

CERTIFICATIONS AND TRAINING

- **ISC2 Certified in Cybersecurity (CC)** – ISC2 | 2024
- **Google Cybersecurity Professional Certificate** – Google | 2024
- **Mastercard Cybersecurity Virtual IT Completion Certificate** – Mastercard
- **Complete Ethical Hacking Bootcamp 2023: Zero to Mastery** – ZTM Academy
- **Web Security & Bug Bounty: Learn Penetration Testing in 2023 (Zero to Mastery)** – ZTM Academy
- **IT Essentials** – Cisco Networking Academy
- **API Penetration Testing Course** – APISEC University
- **Junior Penetration Tester Course** – Tryhackme
- **GRC**

PROJECTS

Phishing Email Detection System (Final Year Project)

- Designed and implemented a **machine learning–driven phishing email detection system** leveraging **Natural Language Processing (NLP)** techniques for text preprocessing and feature engineering.
- Developed and compared multiple machine learning models, including **Logistic Regression** and **XGBoost**, optimizing performance through **hyperparameter tuning** and **cross-validation**.
- Integrated techniques to provide users with **clear, interpretable explanations** of why an email was classified as phishing or not, bridging the gap between AI predictions and human understanding.
- Conducted **exploratory data analysis (EDA)** to identify hidden patterns in phishing email datasets, handled **class imbalance** using oversampling techniques, and enhanced system robustness against **adversarial inputs**.
- Engineered a pipeline that can be extended into a **browser extension/web application**, demonstrating the ability to translate **academic research into real-world applications**.
- This project highlights expertise in **AI engineering, cybersecurity, NLP, and model integration**, showcasing the ability to **build scalable, user-centered security solutions**.

API Penetration Testing Projects

- Conducted hands-on security assessments on vulnerable APIs, including: crAPI, Capital API, VAPI, TPay (Taxtech's payment platform), and various Hack The Box Labs. Exploited common API vulnerabilities including **Broken Object Level Authorization (BOLA)**, **Broken Authentication**, and **Improper Asset Management**, while simulating real-world attack scenarios.
- Skills applied: API enumeration, authentication & authorization bypass, input validation testing, OWASP API Top 10 exploitation, and reporting vulnerabilities.

Vulnerable Machine Exploitation Projects

- Performed penetration testing and exploitation, using Kali Linux on vulnerable systems and environments to build offensive security expertise. Some platforms/targets include: Android, Earth, Jangow 01, Metasploitable 2, OWASPBWA, pfSense, Shellshock, Windows 7, Windows 10.

- Skills applied: network scanning, privilege escalation, buffer overflow exploitation, web application testing, misconfiguration exploitation, password attacks, firewall testing, and shell management

Cybersecurity Awareness Training Course

- Created and taught a structured training program for employees, covering topics such as phishing, password security, and safe online practices and more.
- Designed **engaging learning modules** to simplify technical security concepts for non-technical staff, improving organizational resilience.

LEADERSHIP EXPERIENCE

Founder, Perfume Brand

- Established and currently growing a perfume business, overseeing product development, branding, marketing, and sales.
- Developed entrepreneurial, strategic planning, and customer engagement skills while building a sustainable brand from the ground up.

Executive (General Secretary), Communion Unit – Covenant University

- Served as one of the main executives in the Communion Unit, coordinating unit activities and managing administrative duties.
- Responsibilities included documentation, communication, and organizing meetings, while also contributing to strategic planning, team leadership, and volunteer coordination.
- Strengthened skills in organization, leadership, teamwork, communication, and problem-solving beyond the scope of secretarial work.

Lead, Teens Church

- Provided spiritual leadership and guidance to teenagers, leading impactful programs and challenging other teenagers to more.
- Built skills in people management, program design, and motivating young individuals toward positive growth.

Founder, Bible Study Telegram Platform

- Created and managed an online community dedicated to daily Bible study, engaging participants through structured reading plans, focus verses, and action points.
- Cultivated skills in digital community management, content creation, and spiritual mentorship.

Public Speaking & Mentorship

- Delivered talks and gave charges to audiences of up to 3,000 people, inspiring and motivating large gatherings.
- Consistently engaged in speaking roles within service units, developing confidence, providing counsel and mentorship, clarity, and influence in public communication.
